VTU_Week 5_MCQ

Attempt : 1

Total Mark : 15

Marks Obtained : 13

Section 1 : MCQ

1. After adding a new node at the end of a linked list, what does the current last node become?

Answer

The tail node

Status : Wrong

Marks : 0/1

2. When inserting a new element at the beginning of a linked list, what happens to the current head of the list?

Answer

It becomes the second element

Status : Correct

Marks : 1/1

3. Which of the following are true about a singly linked list?

Answer

It can grow dynamically during runtime.

The last node's "next" pointer points to NULL in a non-circular list.

Status : Correct

Marks : 1/1

4. When inserting a new node into a singly linked list, which of the following are the possible cases for insertion?

Answer

All of the mentioned options

Status : Correct

Marks : 1/1

5. Given the linked list: 5 -> 10 -> 15 -> 20 -> 25 -> NULL. What will be the output of traversing the list and printing each node's data?

Answer

5 10 15 20 25

Status : Correct

Marks : 1/1

6. Which of the following is the process of finding information in a linked list?

Answer

Start from the head of the list and traverse sequentially until finding (or not finding) the node

Status : Correct

Marks : 1/1

7. Which of the following actions needs to be taken when the last item in a linked list is deleted?

Answer

Change the reference of the second last item to NULL reference

Status : Correct

Marks : 1/1

8. Which pointer helps in traversing a doubly linked list in reverse order?

Answer

prev

Status : Correct

Marks : 1/1

9. Which of the following is true about the last node in a doubly linked list?

Answer

Its prev pointer is NULL

Status : Wrong

Marks : 0/1

10. What will be the effect of setting the prev pointer of a node to NULL in a doubly linked list?

Answer

The node will become the new head

Status : Correct

Marks : 1/1

11. How do you delete a node from the middle of a doubly linked list?

Answer

All of the mentioned options

Status : Correct

Marks : 1/1

12. What happens if we insert a node at the beginning of a doubly linked list?

Answer

The previous pointer of the new node is NULL

Status : Correct

Marks : 1/1

13. How many pointers does a node in a doubly linked list have?

Answer

2

Status : Correct

Marks : 1/1

14. In deletion from the end of a doubly linked list, which pointer needs to be updated?

Answer

prev->next = NULL

Status : Correct

Marks : 1/1

15. Which of the following is true about a Doubly Linked List?

Answer

Last node's next pointer is always NULL

Status : Correct

Marks : 1/1
