VTU_Week 7_MCQ

Attempt : 1

Total Mark : 15

Marks Obtained : 12

Section 1 : MCQ

1. Which of the following operations can be used to traverse a Binary Search Tree (BST) in ascending order?

Answer

Inorder traversal

Status : Correct

Marks : 1/1

2. Find the pre-order traversal of the given binary search tree.

Answer

13, 2, 1, 4, 14, 18

Status : Correct

Marks : 1/1

3. Find the postorder traversal of the given binary search tree.

Answer

1, 4, 2, 18, 14, 13

Status : Correct

Marks : 1/1

4. Find the inorder traversal of the given binary search tree.

Answer

1, 2, 4, 6, 7, 9, 10, 14

Status : Correct

Marks : 1/1

5. When comparing a value to be searched with the root node in a BST?

Answer

If it's larger, go to the right subtree

Status : Correct

Marks : 1/1

6. In a binary search tree (BST), if the value to be searched is smaller than the value of the root, where should the search proceed?

Answer

Left subtree

Status : Correct

Marks : 1/1

7. In a binary search tree with nodes 18, 28, 12, 11, 16, 14, 17, what is the value of the right child of the node 12?

Answer

16.

Status : Correct

Marks : 1/1

8. In a binary search tree with nodes 18, 28, 12, 11, 16, 14, 17, what is the value of the left child of the node 16?

Answer

14

Status : Correct

Marks : 1/1

9. The preorder traversal sequence of a binary search tree is 30, 20, 10, 15, 25, 23, 39, 35, 42. Which one of the following is the post-order traversal sequence of the same tree?

Answer

15, 20, 10, 23, 25, 42, 35, 39, 30

Status : Wrong

Marks : 0/1

10. In a binary search tree, which of the following traversals is used for getting ascending order values?

Answer

In-order

Status : Correct

Marks : 1/1

11. Consider the given binary search tree, if the root node is deleted, then the new root can be _____.

Answer

48 or 59

Status : Correct

Marks : 1/1

12. After deleting a node in a binary search tree, how is the replacement node determined if the node to be deleted has only one child?

Answer

Replacement node is the child node itself

Status : Correct

Marks : 1/1

13. What will be the in-order traversal sequence of the following binary search tree, after deleting node 40?

Answer

12 8 20 22 30

Status : Wrong

Marks : 0/1

14. Which of the following nodes would replace node 40 if it were to be deleted?

Answer

30

Status : Correct

Marks : 1/1

15. Which of the following statements is true about deleting a node with one child from a binary search tree?

Answer

The node is directly removed, and its child is merged with grand parent

Status : Wrong

Marks : 0/1
